
Technical Efficiency Sugarcane Farmers Betchani Tchereni

technical efficiency of sugarcane production - technical efficiency studies the conversion of various physical inputs such as labor inputs, land inputs and other semi finished goods and raw materials into outputs. this study is an attempt to estimate the extent of technical efficiency of sugarcane production, to identify a factor that influences such efficiency of sugarcane production and **determinants of technical efficiency of sugarcane ...** - output of sugarcane. mean of technical efficiency was found to be 0.7431. in order to increase the efficiency of sugarcane farms improvements in farmers' education and extension service are the two most important variables which can be used by policy makers. keywords: contract farming, sugarcane, production, technical **measuring technical and environmental efficiency of ...** - technical efficiency measures maximum output produced by minimum use of inputs. even though production of sugarcane is increased by 2.3 percent in 2013-14 as compared to last year but there are some factors affecting technical efficiency of sugarcane are extension services, availability of inputs, **research article analysis of technical efficiency of ...** - computer software stata. result illustrates that technical efficiency of sugarcane crop for the period under study in khyber pakhtunkhwa ranges from minimum 0.47 to maximum 0.98 with mean value of 0.84 percent. this mean that with same resource base average sugarcane growers can increase his yield up to 14% **technical efficiency analysis of sugar cane farming in ...** - technical efficiency analysis of sugarcane farming in malang regency, east java, indonesia agricultural socio-economics journal volume xix, number 1 (2019): 01-08 3 allocate production factors efficiently in order to increase production and productivity. research methods determination of the location of the study was done **estimation of technical, economic and allocative ...** - the small-scale sugarcane farmers suffer from considerable lack technical, allocative and cost efficiency. the mean technical, allocative and cost efficiency estimates are 68.5%, 61.5% and 41.8% respectively. a tobit regression was used to analyse the impact of the farm/farmer characteristics on efficiency. the impact analysis revealed **technical efficiency of the small scale sugarcane farmers ...** - study was designed to determine the technical efficiency of the physical inputs among the different types of small scale sugarcane individual farmers and farmers under a smallholder scheme. **effect of different crop management system on technical ...** - the technical efficiency level of small, medium and large farmers under different crop management system as fresh, ratoon and mixed crop system. the bulk of the data were collected from randomly ... **econometric study for measuring production efficiency of ...** - efficiencies for sugarcane refineries technical and economic efficiencies for sugarcane refineries have been assessed using deap under dea-crs and dea-vrs. scale efficiency has also been assessed for the same refineries. results presented in table (2) indicate that, for abu qorkas refinery, technical efficiency **technical efficiency analysis of sugar cane production in ...** - range of technical efficiency was quite high. the lowest technical efficiency obtained was 0.49 and the highest level of the efficiency was 0.98. paramitha et al (2014) found that the technical efficiency of farmer joining with padjarakan sugar cane factory was 0.95. however, the farmers who did not join to the padjarakan factory had only **sugar cane industry overview and energy efficiency ...** - • giving a brief overview of the energy efficiency considerations that are already implemented in sugar cane mills and the potential energy efficiency improvement measures. ingeneral, this literature survey document consists of review of the the sugar cane industry worldwide and discusses energy efficiency considerations in sugar cane mills. 10 **production efficiency of small holder sugarcane farmers in ...** - (coelli, 1996).technical efficiency looks at the level of inputs and outputs. being technically efficient means to minimise inputs at a given level of outputs, or maximise outputs at a given level of inputs. the method produces relative efficiency scores by establishing which farmers are efficient in comparison with the other farmers in a **assessing technical efficiency of wheat farmers in ...** - indicate that there is significant technical inefficiency with mean score of 78 percent. however, the major factors affecting the efficiency of farmers are no longer years of schooling, visits by extension agents, and land size as most prior studies have suggested. i find that land degradation and weather shocks are major sources of inefficiency. **research article 5(19), july - september, 2019 climate change** - factors on sugarcane yield and production using a state-wise panel data during 1971-2014 in india. (2) to measure the technical efficiency of sugarcane production and yield with climatic and non-climatic factors and without climatic variables across indian states during 1971-2014. **research article net return and allocative efficiency of ...** - efficiency analysis of the process. due to lack of data on input costs and prices most of the studies con-ducted so far have focused technical efficiency (keith, 2015). a number of studies have examined the technical efficiency of sugarcane farms in district d.i. khan ; however, none of the study has been conducted to
